

YOUR SCHOOL'S SUN SAFETY POLICY

If your school currently has no specific sun safety policy, it's worth creating one. Schools have a responsibility to make sure their pupils are protected from the harmful effects of sun exposure while in their

care – and not only is a sun safety policy important in encouraging good health in line with national healthy schools programmes, it can also help your Ofsted rating¹ by promoting the safety of pupils in school.

CREATING YOUR POLICY

- Get the support of your school community by involving key groups such as governors, teachers, school nurses, health & safety coordinators, pupils, and parents, right from the start.
- Look at what the school already does with regard to sun safety. Think about how long pupils are outdoors, what sort of shade is available and whether sunscreen is used in school.
- Draw up a draft sun safety policy (we've included a typical example overleaf) based around how the subject will be included in the curriculum and what measures are being taken to provide protection.

Try to include the four ways to be sun sensible – covering up, staying shady, drinking lots of water and applying sunscreen.

- Send a letter to parents explaining the school's policy. Remind them that they should apply sunscreen before children leave for school, with a bottle of sunscreen with their child's name on it in their school bag so they can reapply it during the day. Once your policy is in place, evaluate how well it's working through pupil questionnaires, monitoring incidences of sunburn. Update your policy every year.

EXTRA HELP

If you need a little extra guidance in creating your sun protection policy, you may find your local Primary Care Trust a useful source of information. The following websites are also helpful:

BE SUN SENSIBLE

SUN SAFETY POLICY – a typical example

We acknowledge the importance of sun protection and want children and staff to be protected from the

harmful UV rays of the sun, and will work with staff, pupils and parents to achieve this through:

Education

- We will talk about being sun sensible in assemblies at the start of the summer term and before summer break
- A letter will be sent to parents and guardians at the start of the summer term, explaining what we are doing about sun protection and how they can help
- Teachers will plan lessons relating to sun safety and information will be provided around the school

Protection

Staying shady:

- Pupils will be encouraged to play in the shade, where this is available
- We are planting trees in the playground to provide additional shade
- We are fundraising to buy a shade canopy to be in place ready for the summer term

Covering up:

- Children should wear wide-brimmed hats that shade the ears, face and neck while outdoors
- Those with mobility issues, e.g. children in wheelchairs, are at additional risk and should cover their legs if wearing shorts
- Our sports uniform will change from vests to T-shirts
- All school staff will wear hats when on playground duty and teaching outdoors

Drinking lots:

- We will make sure water is available and encourage children to drink regularly during hot weather

Creaming up:

- Sunscreen use will be encouraged, especially at break times, during PE lessons, outdoor activities and on school trips. Staff will be provided with extra sunscreen in case children forget their own
- Parents should apply sunscreen *before* their child leaves for school, with a named bottle of sunscreen in their school bag so it can be reapplied during the day. We recommend using as high an SPF as possible

Timetabling:

- Outside activities, school trips and PE lessons will be scheduled before 11am and after 3pm if possible. If unavoidable, we will ensure hats, clothing and sunscreen are all worn to help prevent sunburn

This policy was developed with the help of staff, pupils and parents and it will be reviewed annually.
